

Air Disinfector P150

Presentation

Hylovely Air Disinfector

High-performance with compact size
Disinfecting and killing bacteria and viruses

Clean Air Delivery Rate 180m³/h
Japanese Nidec motor
360° triple-layer filter

Takes up only
50% space
of an A4 paper

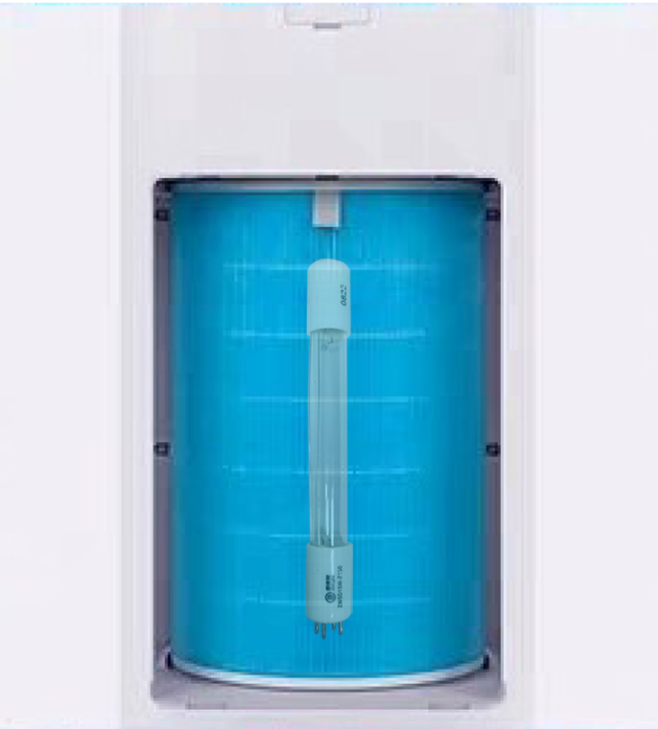

Size:
17.0 x 17.0x 32.6 cm

So dim and quiet,
You don't even
realize it's there

Homey Disinfector is designed simply,
with minimal aesthetics, buttons,
and lights. The low-power Nidec
motors consume just 4.8W, which
reduces noise especially on
Night Mode <25dB.

Night mode Noise < 25dB

High intensity UV lamp
Produces UVC radiation to
kill bacteria and viruses
at 99.99%

Coming clean

Equipped with high intensity UVC tube. UV-C light is an excellent and powerful tool for disinfecting and killing bacteria and viruses. Supplied by the top Japanese air purifier manufacturers, the filter combines an aerodynamic 360° cylindrical design with a powerful triple-filter consisting of primary, HEPA and activated carbon layers. Easy to use and replace, its balance of power and quality is what makes Homey Air Disinfector so effective.

PET primary filter

360° filtration of large particles

-Dust, hair, particles, floccules

Ultra-dense H13-grade HEPA filter

Filters up to 99.97% of PM0.3

HEPA filter to trap PM2.5, PM0.3, pollen

and other inhalable particles.

- 99.97% PM2.5 particles

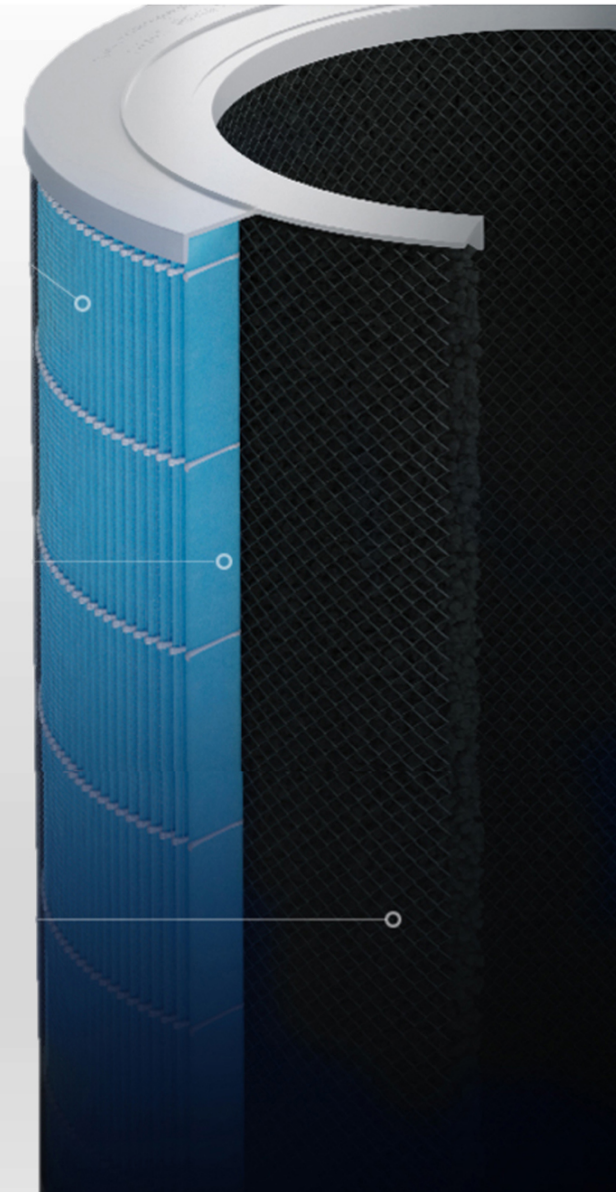

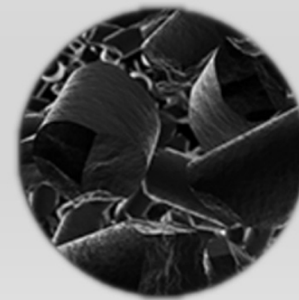

Active carbon filter

Removes formaldehyde, odors and more

- absorb harmful chemicals such as formaldehyde,

benzene, ammonias, as well odors and smoke

Every way the wind blows

Blows purified sterilized air through the roof, flowing out in a 360° motion before getting drawn back through the bottom by a powerful turbine fan. Feel the air flow with a powerful CADR 180m³ /H.

Japanese DC motor

The custom brushless DC motor is the ideal engine for seamless speed transitions. Supplied by world-renown Japanese manufacturer **Nidec** the high-quality motor also lasts twice as long as typical DC motors .

Axial Fan

Increases wind speed, propels air evenly upwards for a powerful 360 ° room circulation

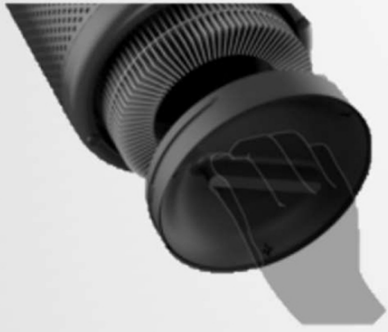

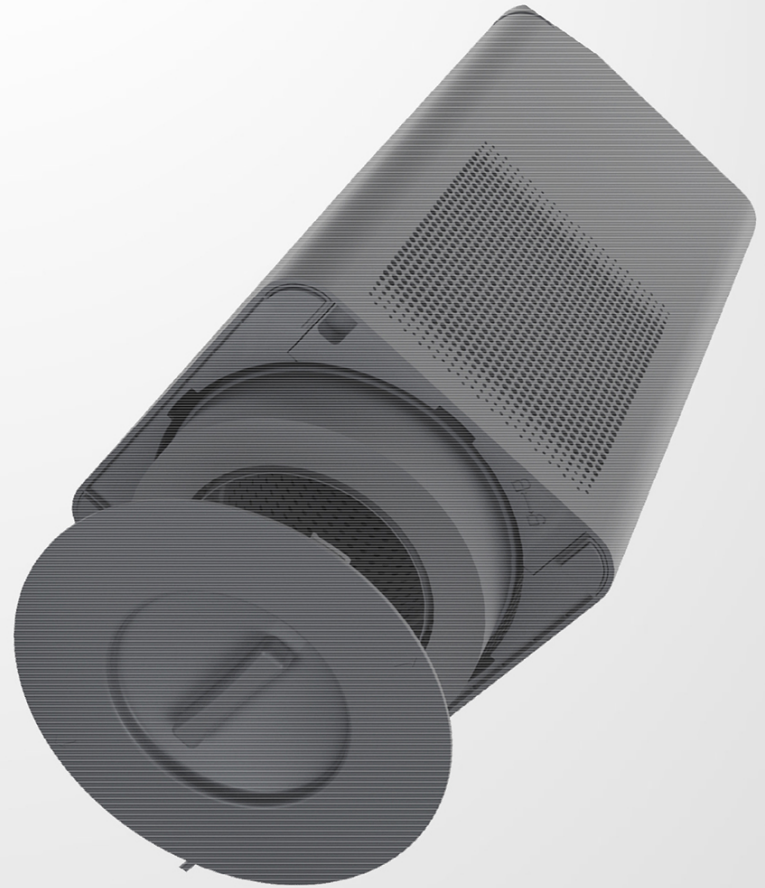

Top touch panel

convenient and easy to operate

- Air quality indicator
- Filter replacement indicator
- Timer 1/2/4/8 hours
- 4 speeds
- Sleep mode
- Auto mode

Simple
to replace
the filter

Features :

10W UVC tube, disinfecting and killing bacteria and viruses

- 4 speed/Sleep Mode/Auto Mode
- LED display (can be dimmed)
- Timer 2/4/6/8h
- Pre-filter
- H13 grade HEPA filter
- Active carbon filter
- Filter replacement indicator
- With odor sensor
- ABS plastic material
- DC 24V adaptor
- Optional: WIFI / particle sensor/odor sensor

Technical Data :

Size:	170*170*326mm
CADR:	180m ³ /h
Coverage area:	20m ²
Power:	25W+10W (UVC)
Noise:	< 45dB
Voltage:	DC 24V / 1.25A

The end ,
thank you !
